OVERVIEW: The AS-6 KINGFISH A (KSR-5) is a supersonic, long-range, liquid-fuel, rocket propelled, air-to-surface missile. It carried a 350 kT nuclear warhead.

DETAILS: The AS-6 KINGFISH cruised at either high or low altitude. In its low altitude profile, it flew at approximately 50 meters altitude. It used inertial mid-course guidance. The baseline missile was equipped with a VS-KN active radar seeker.

NOTES: The AS-6 entered service in 1969. It was used by the Tu-22M and Tu-16 BADGER aircraft. The AS-6 was effectively a scaled down Kh-22 with less range and launch weight, but similar performance and lethality.
